

## **ABSTRACT AMENDMENTS**

### **Summary Abstract**

A device and procedure ~~is suggested~~ for portioning a piece of food in portions with a predetermined weight or predetermined thickness. The device has a pivotable insertion drum (1) arranged in a rotatable manner around its axis with at least one oblong insertion chamber (4) for inserting the piece of food. A knife (3) is arranged on the insertion drum (1) for cutting a portion located in the portioning chamber from the rest of the piece of food.
